Profile Summary

Aspiring AI/ML Engineer with a solid foundation in data structures, algorithms, and statistics. Hands-on experience in building, training, and deploying machine learning models using Python, PyTorch, and Scikit-learn. Proven ability to solve real-world problems through classification, regression, clustering, and natural language processing. Skilled in model evaluation and performance optimization, with a passion for AI research and continuous learning. Familiar with the full ML lifecycle from data preprocessing to deployment and visualization.

Education

Air University **Sep 2021 – July 2025**

Bachelor of Science in Software Engineering *Islamabad, Pakistan*

CGPA: *3.20/4*

- Relevant Coursework: Data Structures, Software Engineering, Algorithms Analysis, Operating Systems, Database Management Systems, Artificial Intelligence, Information Security, Probability and Statistics, Computer Architecture, Web Programming, Machine Learning, Natural Language Processing and Computer Networking.

Technical Skills

Programming Languages: Python, C++, JavaScript
ML Framework and Libraries: Scikit-learn, PyTorch, NumPy, Pandas
ML Techniques: Supervised/Unsupervised Learning, Neural Networks, Deep Learning, Clustering, Model Evaluation
Data Handling: SQL, MongoDB, REST APIs, Data Preprocessing, Feature Engineering
Tools: Jupyter Notebook, Google Colab, TensorBoard, Git, Firebase, Linux
Visualization: Matplotlib, Seaborn

Experience

Airblue Ltd **Feb 2021 – Aug 2021**

MIS Intern *Islamabad, Pakistan*

- Collected, cleaned, and structured internal datasets from flight operations and maintenance logs for analytics and predictive modeling.
- Supported exploratory data analysis (EDA) and statistical profiling to identify trends and anomalies.
- Helped deploy performance monitoring dashboards using Python and Matplotlib to visualize model insights.

Air University **June 2024 – Aug 2024**

Project Intern *Islamabad, Pakistan*

- Built structured data flows for academic and administrative datasets, preparing them for ML-based analytics and dashboards.
- Conducted preprocessing on student performance and attendance data for predictive modeling.
- Assisted in prototyping a recommendation system for course planning using collaborative filtering and user profiles.

Projects

TaskKar (FYP) | *Next.js, Prisma, PostgreSQL, Tailwind CSS, Node.js*

- Built a service marketplace web app with scalable backend and responsive frontend.
- Implemented smart task matching features and explored ML-based algorithms to recommend service providers.

Customer Churn Prediction System | *Python, Scikit-learn, Pandas, Matplotlib*

- Developed a classification model to predict customer churn for a client using logistic regression, decision trees, and random forest.
- Conducted extensive EDA, feature engineering, and hyperparameter tuning to achieve 90% accuracy.

ML-Powered Resume Screener | *Python, NLP (spaCy, Scikit-learn), Streamlit*

- Built a smart resume screening tool using TF-IDF, cosine similarity, and spaCy for semantic job-resume matching.
- Deployed via Streamlit with a user-friendly interface for recruiters.

Student Performance Predictor | *Python, Scikit-learn, Pandas, Seaborn*

- Built a supervised machine learning model to predict student exam outcomes based on attendance, previous grades, and behavioral metrics.
- Achieved 90% prediction accuracy and visualized key performance influencers using correlation heatmaps and box plots.

Certifications

Python for AI & Data Science – IBM (Coursera) **Jan 2024**

- Learned Python fundamentals, data handling with Pandas, and visualization with Matplotlib.

ServiceNow ITSM Bootcamp – Zones IT Solutions **Feb 2025**

- Completed a 2-week intensive bootcamp focused on mastering ServiceNow and IT Service Management (ITSM).
